2 Introduction

This guide covers all aspects of using our software platform effectively.

2.1 Getting Started

Follow these steps to begin your journey with our platform.

2.1.1 Installation

The installation process is straightforward and takes only a few minutes.

2.1.1.1 System Requirements

Before installing, ensure your system meets these requirements:

- Operating System: Windows 10+, macOS 11+, or Linux
- RAM: 4GB minimum, 8GB recommended
- Disk Space: 500MB free space

2.1.1.2 Download and Install

1. Visit our downloads page
2. Select your operating system
3. Run the installer
4. Follow the on-screen instructions

2.1.2 Initial Configuration

After installation, you'll need to configure basic settings.

2.1.2.1 User Profile

Set up your user profile with the following information:

- Username
- Email address
- Password (minimum 8 characters)

2.1.2.2 Preferences

Customize your experience by setting preferences for:

- Theme (light/dark mode)
- Notifications
- Language

2.2 Core Features

Our platform offers a comprehensive set of features designed for productivity.

2.2.1 Document Management

Organize and manage your documents efficiently.

2.2.1.1 Creating Documents

Create new documents using templates or start from scratch:

My Document

This is a sample document.

2.2.1.2 Organizing with Folders

Use folders to keep your workspace organized:

- Personal documents
- Work projects
- Shared files

2.2.2 Collaboration Tools

Work together with your team seamlessly.

2.2.2.1 Real-time Editing

Multiple users can edit documents simultaneously with:

- Live cursor tracking
- Instant updates
- Change highlighting

2.2.2.2 Comments and Reviews

Provide feedback using our commenting system.

2.2.3 Data Visualization

Create stunning visualizations from your data.

2.2.3.1 Charts and Graphs

The system supports various chart types:

2.2.3.2 Interactive Dashboards
Build custom dashboards with drag-and-drop widgets.

2.3 Advanced Topics

Dive deeper into advanced functionality.

2.3.1 API Integration
Integrate with external services using our REST API.

2.3.1.1 Authentication
Authenticate API requests using OAuth 2.0:

```
const token = await getAuthToken(apiKey, apiSecret);
fetch('/api/resource', {
  headers: { 'Authorization': `Bearer ${token}` }
});
```

2.3.1.2 Rate Limits
API calls are limited to prevent abuse:

Plan	Requests/Hour	Burst Limit
Free	100	10
Pro	1,000	50
Enterprise	10,000	200

2.3.2 Automation
Automate repetitive tasks with workflows.

2.3.2.1 Creating Workflows
Define workflow steps:

1. Trigger event
2. Conditions
3. Actions
4. Notifications

2.3.2.2 Scheduling
Schedule workflows to run at specific times or intervals.

2.4 Security
Security is our top priority.

2.4.1 Data Encryption
All data is encrypted both in transit and at rest.

- 2.4.1.1 Transport Security**
- TLS 1.3 for all connections
 - Certificate pinning
 - HSTS enabled

2.4.1.2 Storage Security

Data at rest is encrypted using AES-256:

$$C = E(K, P)$$

Where C is ciphertext, K is the key, and P is plaintext.

2.4.2 Access Control

Manage permissions with role-based access control (RBAC).

2.4.2.1 User Roles

Available roles:

- **Admin:** Full system access
- **Editor:** Can create and modify content
- **Viewer:** Read-only access

2.4.2.2 Permissions

Fine-grained permissions control access to specific features.

2.5 Troubleshooting

Common issues and their solutions.

2.5.1 Connection Problems

If you experience connection issues:

1. Check your internet connection
2. Verify firewall settings
3. Clear browser cache
4. Contact support if issues persist

2.5.2 Performance Issues

To improve performance:

- Close unused tabs
- Clear application cache
- Disable unnecessary extensions
- Upgrade your plan for more resources

2.5.3 Data Recovery

In case of data loss:

1. Check the trash/recycle bin
2. Review version history
3. Contact support for backup restoration

2.6 Conclusion

Thank you for choosing our platform. For additional help, visit our support portal or contact our team.

2.6.1 Additional Resources

- Knowledge Base
- Community Forum
- Video Tutorials

2.6.2 Contact Support

Reach our support team:

- Email: support@example.com
- Phone: 1-800-SUPPORT
- Live Chat: Available 24/7
