Executive Summary

This document demonstrates the header and footer functionality in mdtype. The frontmatter at the top of this file defines custom headers and footers that will appear on every page.

Features Demonstrated

This example shows:

- **Header Left**: Static text ("Company Name")
- **Header Center**: Static text ("Quarterly Report")
- **Header Right**: Dynamic date using `{date:YYYY-MM-DD}` format
- **Footer Left**: Static text ("Confidential")
- **Footer Center**: Page numbers using `{page}` and `{total-pages}` placeholders
- **Footer Right**: Copyright notice

Available Placeholders

You can use these placeholders in your header and footer configuration:

Page Numbers

- `{page}` - Current page number
- `{total-pages}` - Total number of pages

Dates

- `{date}` - Current date in default format (YYYY-MM-DD)
- `{date:YYYY-MM-DD}` - Custom date format
- `{date:DD/MM/YYYY}` - Another format example

Logos (if you have a logo file)

- `{logo:path/to/logo.png}` - Embeds a small logo image

Content Example

Project Status

Performance Metrics

Metric	Q1	Q2	Q3	Q4
Revenue	$1.2M	$1.5M	$1.8M	$2.1M
Users	10K	15K	22K	30K
Uptime	99.9%	99.95%	99.99%	99.99%

Mathematical Analysis

The growth rate formula:

$$g = \frac{Q_4 - Q_1}{Q_1} \times 100\%$$

Conclusion

This example demonstrates how to use YAML frontmatter to configure headers and footers in your Typst documents generated from Markdown.

The headers and footers will appear on every page of the compiled PDF, making it easy to add professional formatting to your documents.
